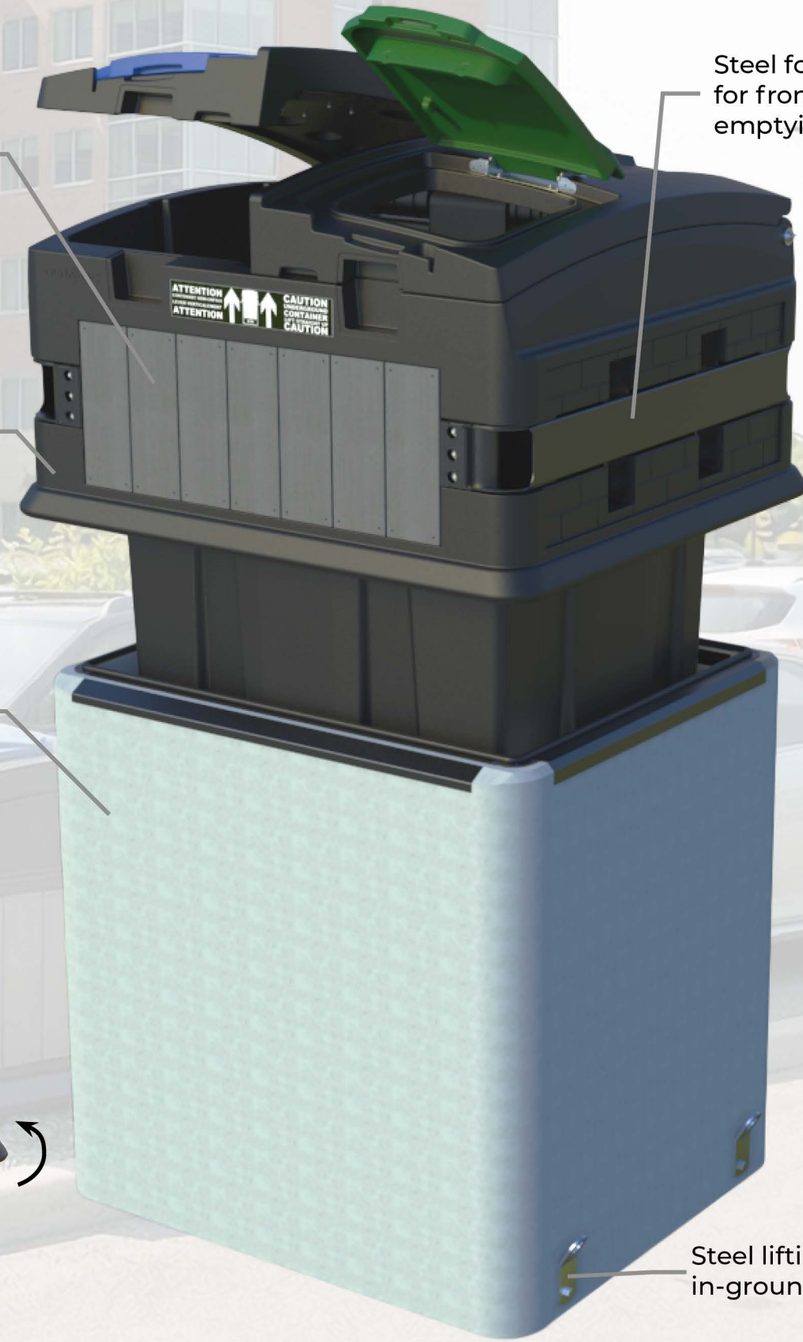
THE IDEAL CONTAINER FOR YOUR ENVIRONMENT...

Recycled plastic slats with a wood-like finish, strong and durable.

One-piece double-wall rotationally molded polyethylene container with UV stabilizer, offering high resistance to weather and impacts.

Preformed 40 MPa concrete insert that does not deform during ground freeze-thaw cycles, guides the container during emptying, and allows for quick installation.

Bin orientation with 12 degrees of freedom



Steel fork boxes for front-load emptying.

Steel lifting ring for in-ground integration.

...BUILT TO MEET YOUR NEEDS!
