## PARTS CATALOG – CHAGNON CABLE HOIST ROLL-OFF SYSTEM

### 1. GENERAL INFORMATION

#### 1.1. INTRODUCTION

This catalog has been developed to facilitate your parts purchases. To get the most out of this catalog, it is essential that you understand the list of components to each view or parts break down. The parts list under each view or parts break down is divided into four columns. Certain parts will have a chart adapted to their specifications in order to facilitate the understanding of the dimensions, materials or accessories specific to this one modifying the order and/or name of the columns.

The first column: "Item" identifies the boxed numbers on each view.

The second column: "Part No." identifies the number of an assembly or component.

The third column: "Description" is used to describe each assembly or component.

The fourth column: "Price" is used to give you the price of the assembly or each component.

The charts of each category offers you several possibilities, they are classified in order of DRC capacity. Afterwards you will find a table including parts compatible with other brands and model Roll-Off.

#### 1.2. IMPORTANT

The model and serial number plates are located on the lower left front side of the equipment.

In order to be as accurate as possible when ordering parts, we recommend that you always provide parts and service clerks with the following information:

- DRC model number
- DRC serial number
- DRC part number (s)
- required quantity
- Catalog reScrewion date (located at the bottom right of the catalog pages)

**CHAGNON**
